WEB RESOURCES

Web Resources

The following web resources contain material which would be of interest to you at different times during the programme. Eventhough there are more specific web sites mentioned under different areas, some which are for a general reference or containing material on several topics are mentioned in the following

Theory into Practice[[1]] TIP is a tool intended to make learning and instructional theory more accessible to educators. The database contains brief summaries of 50 major theories of learning and instruction. These theories can also be accessed by learning domains and concepts.

Vidya Online[[2]] Vidya Online is a very useful and relevant place for you to read, reflect and contribute. The site contains a variety of material for children, teachers and teacher educators. The site also has material in Kannada, which some of you may enjoy reading.

You would find that at several places Wikipedia is referred using the box given below. Wikipedia is a vast and growing collection of resources and learning objects which are for use by educators and is not governed by the major hurdles created by the copyright problems as most of us face while using the internet

	<p style="text-align: center;">Wikipedia</p> <p>Wikipedia has an article on this subject.</p> <p>Visit Wikipedia for more in depth information</p>
